

Autism:

Recovery is an Option

Tools for parents that yield tangible results

Free Lectures

Mr. Raun K. Kaufman will discuss the key principles of *The Son-Rise Program* which led to **his own personal story of recovery**. The material is designed for parents and those caring for children challenged by Autism, Autism Spectrum Disorders, Asperger's, PDD and other related developmental difficulties. The lecture will focus on specific strategies and techniques that can be used immediately with children with developmental challenges.

*“When Brandon was two he was unhappy, continuously crying, not sleeping, and screaming when strangers came to our house. He was unsettled to the point where he would be physically sick. His official diagnosis was Autism. 18 months after starting **The Son-Rise Program**, Brandon is completely transformed. Recent tests by our local education board show that he is now functioning as a typical three-year-old. He loves people and speaks to every person he sees!!! What a miracle! In one year we changed the course of his life!”*

–Erin Coffey
Son-Rise Mom, Ireland
